June 14th, 2012

“Methods and Instruments for Chronic Diseases Management”

Special Session

This session represents a unique opportunity as a joint event between two important conferences: “Chronic Care Model and Proactive Medicine” and ICOST 2012. The session goal is to analyze technological and organizational instruments for the management of different scenarios of chronic diseases. International opinion leaders and stakeholders will present implemented methods and discuss about strategic initiatives. The two conferences, both hosted in Tuscany, “Chronic Care Model and Proactive Medicine”, organized by Local Health Authority of Empoli and the international conference ICOST 2012 on Smart Home and Health Telematics organized by I+S.r.l., want strongly state a common vision and commitment towards a new generation of integrated services for chronic diseases prevention and management able to exploit relevant competences, resources and media currently available in the society.
